

RESPONSE TO INQUIRIES

Date: 7/30/2021

Bid ID #2768

**IFB #2768
Avenue of the Carolinas
Intersection Improvements – Carowinds Blvd.**

The following information is in response to inquiries received regarding this solicitation.
Any actual amendments to the solicitation will be issued via an Addendum:

Q1. Please advise as to what Adaptive System is being used for the Traffic Signal Wireless pods(line item #69) being replaced on this project.

RESPONSE: Synchro Green is the Trafficware traffic adaptive system. It's the only one approved by SCDOT. The Trafficware (Traffic Signal Wireless pods) should be used on all SCDOT signals.

Q2. Also, I see a line item for 8 EA Flat Sheet Signs Erected on span wire. Should that be square foot instead of each?

RESPONSE: Please bid this item as EACH Flat Sheet Sign Erected.

Q3. There is a line item for 730 lf of 3/8" GALVANIZED STEEL CABLE. I don't see where that could be used on this job. There are two steel strain poles but there would only be about 35-40 lf there. The intersection is existing so there shouldn't be any needed there. Please advise.

RESPONSE: The cable is the span wire for the extra signal heads shown for the right turn lane.

Q4. What color powder coat for the steel strain poles?

RESPONSE: No powder coat needed for the poles.
